

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Original) A therapeutic agent produced by a process comprising the steps of :
selecting a first measure of green tea polyphenols; and
mixing said green tea polyphenols with a second measure of tyrosinase.
2. (Original) The product of Claim 1 wherein the process further comprises the step
of extracting the mixture of said green tea polyphenols and tyrosinase after a period of oxidation
reaction there between which produces theaflavins, but before the substantial formation compounds
other than theaflavins.
3. (Original) A sunburn preventative agent produced by a process comprising the
steps of:
selecting a first measure of green tea polyphenols; and
mixing said green tea polyphenols with a second measure of tyrosinase.
4. (Original) The product of Claim 3 wherein the process further comprise the step
of extracting the mixture of said green tea polyphenols and tyrosinase after a period of oxidation
reaction there between which produces theaflavins, but before the substantial formation compounds
other than theaflavins.
5. (Original) A sunburn therapeutic agent produced by a process comprising the steps
of:
selecting a first measure of green tea polyphenols; and
mixing said green tea polyphenols with a second measure of tyrosinase.

6. (Original) The product of Claim 5 wherein the process further comprises the step of extracting the mixture of said green tea polyphenols and tyrosinase after a period of oxidation reaction there between which produces theaflavins, but before the substantial formation compounds other than theaflavins.

7. (Original) A nutritional supplement produced by a process comprising the steps of:
selecting a first measure of green tea polyphenols; and
mixing said green tea with a second measure of tyrosinase.

8. (Original) The product of Claim 7 wherein the process further comprises the step of extracting the mixture of said green tea polyphenols and tyrosinase after a period of oxidation reaction there between which produces theaflavins, but before the substantial formation compounds other than theaflavins.

9. (Original) A comprehensive agent produced by a process comprising the steps of:
selecting a first measure of green tea polyphenols; and
mixing said green tea polyphenols with a second measure of tyrosinase.

10. (Original) The product of Claim 9 wherein the process further comprises the step of extracting the mixture of said green tea polyphenols and tyrosinase after a period of oxidation reaction there between which produces theaflavins, but before the substantial formation compounds other than theaflavins.

11. (Withdrawn) A process of producing a disease preventative and therapeutic agent comprising the steps of:
selecting a first measure of green tea polyphenols; and
mixing said green tea polyphenols with a second measure of tyrosinase.

12. (Original) The product of Claim 10 wherein the process further comprises the step of extracting the mixture of said green tea polyphenols and tyrosinase after a period of oxidation reaction there between which produces theaflavins, but before the substantial formation compounds other than theaflavins.
